

# Measurements for Ruby the Witch

Clay Colors you need to  
**have on hand:**

Red	
Peach	
purple	
yellow	
black	
green	
orange	
grey	
pink	
white	
blue	

# Notes

Mix your black clay with a little bit of white to make it a little more firm. If any other of your clay is too soft or sticky add a little white as well.

If you see this ~ in front of the measurement you wont need all the clay, just use what you need.

When there is a bold “**2x**” it means you need to measure two times (or how ever many it states) to get the right amount and “**1/2**” indicates that you only need half of the measured amount. “Tiny” means it’s just a speck and “handful” is more than the largest mold can fit.

When there is multiple of the same parts, it will be indicated with “(2)” and the measurement is for each part individual.
