Measurements in grams/mm

Stay Puft Marshmallow Man

Below you'll find the approximate amounts of clay you need of each color for 1 Stay Puft. If you want to make more adjust accordingly. Mix as much color as you like, one drop at a time. It's okay if it's pale, you can paint with soft pastels to make it pop. I recommend buying black pre-mixed. Use a scale for grams or the [size chart](#) for mm

Amounts of Clay you
need to prepare/have on hand:

White	25g
Blue	0.5g
Red	*2g
Black	tiny

*you won't need that much but I recommend not to mix any less than 2g

Measurements for Stay Puft Marshmallow Man

Amounts of Clay you
need to make for each part:
